SHAKTIDHAR MOHAPATRA

SOFTWARE ENGINEER | FULL-STACK ENGINEER

Bhubaneswar, Odisha +91-9777887204 sdmohapatra7@gmail.com GitHub LinkedIn Portfolio

SUMMARY

Objective: To use my experience in full-stack development to build reliable web applications that solve real-world problems.

Software Engineer with a little over 2 years of experience building web applications from the ground up. My core stack includes **React.js**, **TypeScript**, **Node.js**, and backend technologies like **Java** and **.NET Core**. I've spent my career working on complex systems, which includes building enterprise ERP modules, speeding up frontend load times, and integrating payment gateways. I enjoy tackling problems from end to end—starting with database planning and system design all the way to building responsive user interfaces. My main focus is always on writing clean, readable code and delivering software that users actually enjoy using.

SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, Java 17, Python 3, HTML5, CSS3, XML, SASS.

Frameworks: React.js 18, Node.js 20, .NET Core 8, Spring Boot, Django, Redux Toolkit, Tailwind CSS, Zustand, jQuery, Bootstrap.

Tools & DBs: PostgreSQL, SQL Server, MongoDB, Redis, Git/GitHub, Docker, AWS, CI/CD, Vite, Postman, Vercel, Netlify.

Core Concepts: RESTful APIs, JWT, Unit Testing, ERP Systems, System Design, Scalability, Performance Optimization, MVC Architecture, Object-Oriented Programming (OOP), Agile Methodology, Responsive Design, User Experience (UX).

Soft Skills: Teamwork, Adaptability, Problem Solving, Communication.

EXPERIENCE

Vis Network Pvt Ltd **July 2026 – Present**
Software Engineer *Bhubaneswar, Odisha*

- Currently focused on frontend development for the **Axis Startek** project, building out new features and making sure the interface is fast and works well on all devices.
- Working on maintenance and support for the **OneSupport** platform for **IndiGo**, resolving production bugs, troubleshooting issues, and rolling out routine updates to keep operations running smoothly.
- Responsible for analyzing the existing codebase and pushing updates to core modules to keep up with changing client requirements.
- Working closely with backend developers to wire up new APIs and ensure that data flows seamlessly from the database to the user's screen.

Kaizeninfocomm Pvt Ltd **April 2024 – Jan 2026**
Frontend Developer *Ahmedabad, Gujarat*

- Built web dashboards and a Point of Sale (POS) system deployed across **50+ restaurants** using **React.js**, **jQuery**, and **AJAX**. Refactored legacy code into reusable components, helping pages load about **30%** faster.
- Wired up third-party APIs like **Deliveroo and UberEats** to pull in orders automatically, eliminating manual entry errors and boosting order volume by **40%**.
- Developed inventory and franchise management features to handle purchase invoices and track food waste, helping clients reduce overhead costs by **18%**.
- Integrated payment gateways like **Razorpay, PayU, and Stripe** to smooth out the checkout process, increasing success rates by **15%**.
- Created a mobile-friendly web app allowing customers to order directly from their tables using QR codes, actively supporting over **2,000** users daily.
- Wrote **XSLT and XML** scripts to render data dynamically on a high-traffic platform handling **over 10,000** transactions a day.

Coding Ninjas **July 2023 – March 2024**
Teaching Assistant *Remote*

- Mentored over **600 students** learning web development. I helped them by reviewing their code, figuring out bugs, and breaking down tough concepts into simple terms.
- Kept a rating of **4.7/5.0** while personally answering over **850** questions from students.
- Walked students through building their final projects, pushing them to solve problems on their own and write clean, standard code.

PROJECTS

Hospital Management System (HMS) **React.js 18, TypeScript, ASP.NET Core 8 Web API, EF Core, SQL Server**

View Source Code

- **Clean Architecture:** Built a healthcare platform with different views for admins, doctors, nurses, and patients. Kept the backend organized using Clean Architecture and CQRS patterns.
- **Secure Authentication:** Set up role-based logins using JWTs and refresh tokens to make sure all API endpoints were secure and private.
- **Vitals & Billing:** Created features to log patient vitals, track medical history, and automatically generate prescriptions and bills.

Society Maintenance System (SocietyPro) **React.js 18, Python, Django, PostgreSQL, JWT**

View Source Code | Live Demo

- **Full-Stack Management:** Made a management tool for housing societies that handles data for over **200 homes**. It automatically calculates monthly maintenance bills and tracks expenses so managers don't have to do it by hand.
- **Security & Access Control:** Locked down financial data by building a custom role-based permission system with JWT authentication.
- **Dynamic Architecture:** Built a settings dashboard so admins can easily change things like tax rates, currencies, and categories on the fly without needing a developer to push a code update.

WhatsApp Clone (Real-Time Messaging Application) **React.js 18, Java 17, Spring Boot, WebSockets, PostgreSQL, Zustand**

View Source Code | Live Demo

- **Real-Time Communication:** Built a chat app using **WebSockets** that feels instant (under 100ms lag). It supports one-on-one chats, group chats, typing indicators, and read receipts.
- **State Management:** Used **Zustand** to keep track of message histories and user sessions in the frontend without things getting messy.
- **Scalable Backend:** Wrote the backend in Java with **Spring Boot**, hooked up Spring Security for safe logins, and tuned the database queries so the app runs fast.

LinkedIn Clone (Professional Networking Platform) **React.js 18, Node.js 20, Socket.io, Redis, MongoDB**

View Source Code | Live Demo

- **Social Networking Engine:** Created a networking site where users can set up profiles and connect with others. The backend is solid enough to handle over **1,000 people online at once**.
- **Multimedia Interaction:** Added live likes, comments, and file uploads. Used **Cloudinary** to handle saving all the images and videos efficiently.
- **Performance Optimization:** Got the main feed to load in **under 200ms** by using **Redis** for caching and setting up better indexes in MongoDB.

Salon Booking Application **React.js 18, Redux Toolkit, Tailwind CSS, Node.js 20**

View Source Code | Live Demo

- **Automated Scheduling:** Built a booking system that figures out which time slots are actually open and stops customers from double-booking appointments.
- **State-Driven UX:** Used **Redux Toolkit** to handle the multi-step booking process, and used Formik and Yup to make sure users entered their details correctly.
- **Admin Portal:** Gave salon owners their own dashboard so they can easily set staff schedules, check their earnings, and change up the services they offer.

Ecommerce App (ESmart) **Node.js 20, Express, MongoDB, React.js 18, Redux**

View Source Code | Live Demo

- **Full-Lifecycle E-Commerce:** Coded an online store with saved shopping carts, wishlists, and a checkout powered by **Razorpay**. It easily supports over **500 concurrent shoppers**.
- **Automated Reporting:** Wrote background workers that automatically create PDF receipts and track orders after a purchase, saving the store owners a ton of manual work.
- **Inventory Control:** Built a backend view for owners to keep an eye on inventory, set up tax rules, and look at their sales data.

EDUCATION

Master of Science in Mathematics **2019 – 2021**

Fakir Mohan University | Score: 81% *Odisha*

- **Academic Honors:** Graduated in the top percentiles with a specialization in Advanced Mathematics.
- **Relevant Coursework:** Advanced Calculus, Data Analysis, Discrete Mathematics, Linear Algebra, and Statistical Modeling.

Bachelor of Science in Mathematics **2015 – 2019**

Maharaja Purna Chandra Autonomous College | Score: 70% *Odisha*

- **Relevant Coursework:** Probability Theory, Applied Mathematics, Computational Methods, and Number Theory.

CERTIFICATIONS

- **Career Camp | Fullstack Web Development:** Intensive course covering Java, DSA, MERN Stack, and OOPS. View Credential
- **DOEACC 'O' Level:** Certification for foundation level courses in Computer Applications. View Credential
